Step 1 — Before Starting

(i) Complete this stage:

• If you are upgrading from an already built Proforge 2/2S Single Extruder setup.

(*i*) Skip this stage and continue <u>here</u>:

• If you are building the Dual Switching Extruder from the Proforge 2/2S build guides

Step 2 — Dismounting the Single Hotend

- Remove the PTFE Tubing from the Hotend and Extruder.
- Cut the cable tie holding the cables to the carriage and remove the two M3 x 8mm bolts.
