Stage 00: Unboxing

Unboxing the Axis Dual Extrusion Upgrade.

Written By: Makertech

Step 1 — Dual Extrusion

- Splitter Kit
- Spool Holder
- Extruder Kit
- A4988 Driver
- NEMA 17 Motor

Step 2 — Updated Splitter

⚠ V2 of the splitter is now shipping with all kits ordered after 1st October 2020.

- i** The [new design](#) reduces the likelihood of jamming and provides a straighter path for the filament. We've also removed the need for the short ptfe tubes.
- i** It is available to also 3d print, the STL files can be found here:
 - [Axis Dual Splitter v2_Front](#)
 - [Axis Dual Splitter v2_Back](#)
- ★** It uses the same hardware already included with the original splitter however you will also need three M3 x 10mm or longer bolts and three M3 nyloc nuts to secure the two halves of the splitter.
